

# Harms- GET ABS

## Quality of Work: 3

Comments: The code in the html file looks correct, but a lot of the text blocks simply need to be checked for spelling and grammar mistakes. The text in the HTML files could also be formatted in a way that it will be easier to read while editing. (It's possible that the code formatting appears different on the editor and this is just an issue on GitHub) The readme file is detailed but could be a bit more concise as it is a little repetitive.

## Intellectual Merit - 3

Comments: The app is an interesting idea that addresses a problem that a lot of people have when going to the gym. I think that this project will be doable within a semester, but if it turns out to be too complex doing a website rather than an app could be easier.

## Video - 0

Comments: The Progress part of the readme talks about a video being posted, but I do not see it.
